Zaky is an undergraduate student majoring in Informatics Engineering at Universitas Airlangga, with a strong interest in software development, business strategy, and application design. He possesses the ability to adapt quickly to new environments, collaborate effectively within teams, and contribute actively to organizational and technical projects. Zaky is passionate about technology development, especially in mobile application development, frontend development, and UI/UX design, and software engineering.

Education Level

Universitas Airlangga - Surabaya	Aug 2023 - Apr 2027 (Expected)
<i>Bachelor of Undergraduate in Informatics Engineering, 3.53/4.00</i>	
- Actively participate in many campus activities, such as organizations, and seminars. - Relevant Coursework: Software Engineering, Database Systems, UI/ UX Design, Mobile Application Development, System Analysis and Design	

Project Experience

TripMate - Mobile Application Prototype	May 2025
<i>UI/UX Designer Figma</i>	
- Developed complete UI/UX design including wireframes and high-fidelity prototypes. - Designed personalized destination, culinary, entertainment, and restaurant recommendation features. - Created authentication, account setup, and wishlist functionalities. - Independently completed the entire design process from concept to prototype.	
PerfectBite - Healthy Lifestyle Mobile Application Prototype	Jun 2025
<i>UI/UX Designer Figma</i>	
- Designed intuitive interfaces for calorie tracking and healthy lifestyle management. - Created nutrition scanning, healthy recipe recommendation, and meal ordering features. - Designed supporting exercise and fitness recommendation modules. - Collaborated in a team of three members to develop the complete application design.	
KamusKita - Regional Language Learning Mobile Application Prototype	May 2025 - Jun 2025
<i>UI/UX Designer Figma</i>	
- Created wireframes and high-fidelity designs in both light and dark mode. - Designed gamification systems including leaderboards, rewards, and user statistics. - Developed regional language dictionary and adaptive learning features. - Collaborated in a team of four members to create the complete user experience.	
Gerobak Coffee - Mobile Application	May 2025 - Jul 2025
<i>Full-Stack Developer Flutter & PocketBase</i>	
- Implemented product browsing, cart management, ordering, and payment workflows. - Developed order history, total spending statistics, and reorder functionality. - Built admin dashboard featuring product, stock, category, and user management. - Developed cashier system with QR scanning and manual order processing capabilities. - Implemented reporting and analytics features for operational monitoring.	

- Independently handled system design, development, testing, and deployment.

CampusLibrary - Library Management System
Full-Stack Developer | Laravel

Oct 2024 - Nov 2024

- Implemented role-based authentication for Admin, Lecturer, and Student users.
- Developed user, role, and menu management modules for administrators.
- Built book category and book management features for lecturers.
- Implemented borrowing and returning workflows for students.
- Designed responsive dashboard interfaces for different user roles.
- Independently developed the entire system from database design to deployment.

Sistem Pelaporan Prestasi API
Backend Developer | Golang, Fiber, PostgreSQL, MongoDB

Oct 2025 - Dec 2025

- Implemented authentication and authorization features including login, refresh token, profile management, and logout.
- Developed role-based user and achievement management modules.
- Built achievement submission, verification, rejection, attachment upload, and history tracking features.
- Implemented student and lecturer relationship management.
- Developed reporting and analytics endpoints for achievement monitoring.
- Integrated Swagger documentation for API testing and integration.
- Independently designed and developed the entire backend architecture.

Alumni Management System API
Backend Developer | Golang, Fiber, MongoDB

Aug 2025 - Sep 2025

- Implemented authentication and role-based authorization mechanisms.
- Developed alumni profile and employment management functionalities.
- Built CRUD operations for alumni records and employment history.
- Implemented file upload and document management services.
- Developed soft-delete and trash management features.
- Configured middleware for authentication, CORS, and access control.
- Independently developed the complete backend system architecture.

DriveZone - E-Commerce Website
Frontend Developer | Tailwind CSS

Jun 2025 - Jul 2025

- Developed responsive e-commerce website interfaces using Tailwind CSS.
- Built modern and user-friendly UI components to improve user experience.
- Successfully implemented and deployed frontend features from scratch

Organisational Experience

Himpunan Mahasiswa D4 Teknik Informatika
Executive Division Chairman

Jan 2025 - Nov 2025

- Led and coordinated multiple departments within the Informatics Engineering Student Association
- Managed strategic planning, delegation, and evaluation for organizational programs.
- Improved teamwork effectiveness and student engagement through organizational initiatives.

Himpunan Mahasiswa D4 Teknik Informatika
Education Division Staff

Jan 2024 - Nov 2024

- Actively participated in various committees and organizational activities within the Informatics Engineering

Student Association.

- Collaborated with internal divisions and committee members in managing student activities and organizational events.
- Frequently served as a coordinator in multiple committees, responsible for managing team coordination and ensuring smooth event execution.

Ikatan Mahasiswa Minang (IMAMI)

Oct 2023 - Nov 2024

Kominfo Division Staff

- Learned and applied branding strategies to foster organizational development and growth.
- Improved teamwork, communication, and technology utilization skills.
- Contributed to publication and information management activities.

Skills, Achievements & Other Experience

- **Achievements** (2026): Cloud Computing Certification – IBM Skill
- **Achievements** (2025): Junior Mobile Programmer Certification — BNSP / LSP Teknologi Digital
- **Achievements** (2024) : Cyber Security Junior Certification – Cisco Networking Academy, NDG Linux Unhatched - Cisco Networking Academy
- **Soft Skills**: Leadership, strategic planning, team management, cross-functional collaboration, public speaking, effective communication, critical thinking, analytical problem- solving, adaptability, and agile project management.
- **Hard Skills**: Full-stack mobile and web development, RESTful API design, microservices architecture, UI/UX wireframing and high-fidelity prototyping, software requirement analysis, software quality assurance (SQA) and system testing, relational and non- relational database management, data mining, machine learning classification, and cloud computing engineering.
- **Tools & Frameworks**: Flutter, Dart, Golang, Fiber, Laravel, PHP, Tailwind CSS, HTML5, CSS3, JavaScript, Figma, PostgreSQL, MySQL, MongoDB, PocketBase, Swagger, Git, GitHub, Docker, and Microsoft Office Suite.
